Hey all,
Looking for some help on setting up one UAD-1 card in a paris system. I know you need to install a wrapper.
So Paris sees the card but needs the wrapper to get it going.
What is the best way on doing this right?
So the UAD card is installed in its own folder as of now.
No wrapper installed as of yet.
I could not find the folder for Paris VST plug-in's,
Is it in the Paris main folder?
So anyway I don't need to mess this up any help would be great.
Also Paris is a 32 track system (2 X EDS-1000 cards)
Cheers and thanks !!
JA.
