Subject: RME HDSP 3.0.1 drivers sync problem

Hi,

I just downloaded and installed the new RME HDSP WDM 3.0.1 drivers.

I now cannot sync. PARIS and Cubase 3.1.1 any more. I have been trying both
ADAT sync and ASIO over ADAT, but Cubase does not start when I hit play in
PARIS, this worked perfectly with the old drivers.

Anyone seen the same problem?

BR

Arne-J.

Hey Arne,

I'm having the same problem. I posted on the rme newsgroup and am awaiting a response. Meanwhile, if anybody has any ideas about this, please let us know.

New drivers? Hmmm... ...can it be the new drivers are to get RME compatible with Vista?...
....So, why change the "old" drivers when they worked perfectly with your system?...
