Hey everybody

Is it just the same ole blank space holders that come with the MEC? or is it like the 8 in card that has a functioning faceplate with LEDs?

in the process of acquiring one and I'm slightly confused having never actually seen one...or even a photo of one.

thanks in advance

p

OK, thanks for the info...

but, now I have doubts about the Easter Bunny.

but i DO believe in the original easter mouse. unfortunately, said mouse had very large ears and backed tail first into a cotton ball and thusly was mistaken for a rabbit and...well i think you can extrapolate the rest from there.

I've seen lots of mammals in my life and the only thing that ever came out of them that remotely resembles chocolate eggs makes me quite suspicious of that whole scenario.
