I'm trying to help 2 different fellas put together their home studios.
One is a musician who'll be just doing his own stuff and one is a guy
switching from a fostex 1" 16track that he's been demoing small acts
with. They've both got no clue about the computer world - at all - and
digital scares them, so naturally they've been looking at more fostex
stuff, like the 24track rackmount.

I don't think this unit will serve either of them very well and will
take an additional amound of outboard gear to make it work, effectively
cancelling out any savings they'd be getting with this inexpensive deck.

So, I ran across this cute lil' number
http://news.harmony-central.com/Newp/2005/X-48.html.
<http://news.harmony-central.com/Newp/2005/X-48.html>

It seems like the cat's meow for a small setup. Have any of you
guys/gals any experience/knowledge about this you can share?

cheers,

jef

Hi'y Don,

.....ya no doubt...I didn't see anything like that on the tascam site, an
admitedly superficial browse though...and with the large D-Sub
connectors I'm assuming the I/O is proprietary, though I'd hope not.

One is a musician who'll be just doing his own stuff and one is a guy
switching from a fostex 1" 16track that he's been demoing small acts
with. They've both got no clue about the computer world - at all - and
digital scares them, so naturally they've been looking at more fostex
stuff, like the 24track rackmount.

I don't think this unit will serve either of them very well and will
take an additional amound of outboard gear to make it work, effectively
cancelling out any savings they'd be getting with this inexpensive deck.

So, I ran across this cute lil' number
<a class="moz-txt-link-freetext"

href="http://news.harmony-central.com/Newp/2005/X-48.html">http://news.harmony-central.com/
Newp/2005/X-48.html.
<a class="moz-txt-link-rfc2396E"

href="http://news.harmony-central.com/Newp/2005/X-48.html"><http://news.harmony-central.com/Newp/2005/X-48.html>

It seems like the cat's meow for a small setup. Have any of you guys/gals any experience/knowledge about this you can share?

cheers,

jef
