Hi Kim,

Thanks for jumping in for me.

The ASIO driver is separate. I'm still working on it. It's taking longer partly because Pro Tools was such a pain to work with and partly because I have so little time.

I'm also spending time trying to get PARIS 3.2 to work.

I guess most people don't know - Edmund gave me a PARIS.exe that he asked me to check to see if it was PACE free. It didn't work. With Kim and Kerry's help, we've managed to get it to the point that it's about to switch from the splash screen to the main window before it crashes.

Here's a screen shot.

I have no idea if we're going to get this to work, but we sure are trying.

That's the latest...

Mike
