I posted this a while back--I think you may have been gone for the Thanksgiving holiday... :)

Lamont,

You mentioned in the Pulsar thread:

"My XP /Paris rig is so stable, and with the URS and Waves SSL plugins..

It's

mixing dream for ITBB mixing.."

Would you mind posting your setup, computerswise especially, but also Paris hardware. I really don't want to jump through as many hoops as the multi computer thing. I am getting fantastic results as is with paris, especially using lots of analog inserts and external verbs. I just want to increase my horsepower and go to the SSL plugs etc. Sounds like you are doing what I want to do.

I use 3 mecs with 8 analog inserts per mec (8in/8out cards) with a huge rack of outboard. A couple of ADAT cards for returning the verbs like the KSP8, spdif i/os for verbs on various cards, and IF2's for multing via analog verb sends across submixes etc.

I have one UAD card and usually get a sound I like and just render it.

I want to go to a 4 mec setup, with more plugin horsepower. Like I said, I love my setup, and it brings me all the work I can handle.

My inquiring mind wants to know... :) 'preciate it...

Hi John,

I'm sorry..I just got back from a holliday break..

Yes. :)

My Paris system is :

MOBO: Asus ANX8x-e(5 PCI Slots)

CPU : AMD Athlon XP 2800

Ram : 2 Gigs
OS :Win XP-Pro
1 x 250 gig system drive
2 X 400-7200 Gig recording drives
* I have a Magma Chasis(13 slots) for my Paris Cards & EMU 1212M(for Wavelab and other apps)..

Thanks a lot--how many instances of the SSL plugs can you run at a time?

(by the way, where are you located and what is your last name?)

Thanks again...
