For those of us who never got to see what a fully "skinned" PARIS looks like, Mike Yanoska has graciously sent me some screenshots which are now on display here:

[http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=Paris Skins](http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=Paris+Skins)

\_Very\_ cool! Pretty inspiring, actually, the idea of keeping different copies of the .exe on hand to boot into different "looks". Tempts me to try my (unskilled) hand at skinning PARIS so it looks like a Neve or an SSL.

:D

I'm sorry, I've been slacking. The remaining mission is to clean up the install docs and package and post the remaining skins, but I'll get on it - if you take an RSS feed from the Wiki it'll let you know as soon as they're up.

Mea culpa!
