Hi all,

I'm new to the newsgroup, but have been using Paris for years. I decided to
buy a system of my own and have had nothing but problems. Can someone help
me?

Take care,

John

Very likely.. please post your system setup, computer, paris hardware, and
what problem you have with details.

Also, check out my site for tips.
www.kfocus.com/paris
and also www.parisfaqs.com

Welcome John, you've come to the right place.

Give us some more info so we can help you out - OS? Computer? What interface, 442, MEC? How many EDS cards? What's the problem? Can't get it installed? Installs but quits? Installs and runs fine but can't hear headphones? Let us know specifics and we can give specific advice.

- Kerry

PS: Here are some resources for you to be aware of:

PARIS Wiki: http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=HomeP age

Your first stop should be the Bugs/Troubleshooting section:
 http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=BugsT roubleshooting

.... And John Bercik's PARIS site: http://www.kfocus.com/paris/

Hi John, as was said, please post some specs/clues of your problem so we can
try to solve your Paris issues. This forum is full of extremely
knowledgeable folks that are ready to help.
Symptoms, how many EDS, I/O interface, OS, Ram, Pwr supp....??
Good luck

Rob_A
