Probably the same. But ask the director what he wants.

Cheers,

-Jamie

I agreed to master one song that will be in an upcoming History channel  
show. The guy that lined me up to do it said the client wanted a mastered  
version for CD replication and a mastered version for the TV broadcast.  
Does anybody know if there's a difference, and if so, what's different?  
level, compression...?!

The Audio for television I've done couldn't peak above -10dB, and had to be  
48k. But, I think you should ask the director, too.

All the best,

Mike

I guarantee that the director would not have a clue.  
Best to check with the tech guys at the network.
