>Doug, this seems to again be a long story for you. Have you tested with the
new Matrox G450 certified drivers from sept.05. I had no luck with the new
driver on my sForce Epox 9NDA3+ board but maybe VIA will eat it? The new
driver is for WinXP.

>Yeh, I think plenty of us have gone through that kind of problem without remembering 5-8 years back in time. Now I remember we could get a program that changed which recording program that should be active, if you had more than one installed, to eliminate chrashings. It can be a good idea to uninstall all that kind of stuff and use a regcleaner program to clean up the reg file. Maybe start regedit and search for strings to the uninstalled programs and delete it manually before only installing the program you want to use to record CD/DVD's with. But as allways, it's a good idea to have a backup of the system.
