If you aren't already aware of this, UA just released version 4.4.0 software for their famous 33609 compressor. Looks pretty neat.

<http://webmail.pas.earthlink.net/wam/msg.jsp?msgid=14804&folder=EarthLink+Services.spamBlocker.Suspect+Email&x=1578451007>

Not DJ but...

I had it for a few hours before my temp license timed out prematurely. Sounds nice and fairly close to the real thing. I did a short comparison to my Portico5043. The UAD has a similar flavor and controls the dynamics in a very similar way, but it is missing the creamy sound of the hardware - And I hate people

I will get it. I might as well render the real thing.

Gene and all others with comments,

Is the Neve 33609 even worth the bother?

I want to use the \$50 coupon on a plug. I'm strongly considering the = Precision Multiband.
If it sounds as good as it looks and functions as simply as it appears I =

think it could make
a difference in my lower end mastering projects (the only ones I do). =
Now I'm using Paris EQ,=20
NoLimit, Paris Comp, but no real pristine compression. The Waves =
multiband is average at best=20
to my ear. That's all I've got around here in higher end software. =
I've delved into the Waves Ren Comp=20
a few times too. It's okay. The Sakis method is too involved for my =
limited mastering hours. I typically
have to get a CD done in less than four hours to make it worth the =
client's/my while.

For \$200 or less is there a better choice for an easy to use multiband =
comp? Otherwise I might spring for the=20
1073 but I have two Neve pres here in hardware form that I track with =
alot.

Is the UAD 140 way better than the SIR plates? If not I'll pass on that =
too.

I'm thinking the Cambridge EQ (just got that and like it) with the =
Precision Multiband Comp would be a=20
fine addition to a sweeter sounding master and even individual tracks =
here and there. =20

All opinions welcome!
Tom

Gene,
I have a stereo pair of Distressors and a Demeter VTCL-2 tube comp. I don't think either of these comps are right for stereo bus work at the mastering level. Is your experience with the UAD Mastering series plugs less=20 fruitful than my hardware options? I really don't want to buy a hardware mastering comp.
Tom

If I didn't have the Portico, I might consider it but I am a glutton. =
I have
many software tools that I have purchased that I use infrequently or =
never,
and if I only bought what I really needed, I would only have a =
fraction of
my current tools. Not bragging or proud of this, I'm just a sucker for =
this
shit. I've heard Paris-only tracks that sound great.
I'm on a ten-step program - Right!
Gene
Actually, the only way to significantly improve the native sound of =
Paris
is with improved converters, hardware and clocking. Plugins always =
seem to
move the sound "laterally" to me. Not up the scale of quality. A few =

exceptions,

yes, but not many. The Paris compressors are a weakness so any good =
plugin
will help, but good hardware is still better.

Gene,

Thanks for your input. My mastering jobs are definitely on the low end scale. If I didn't do it, they'd run disks with no attention to mastering at all. The higher end clients are all going to a select few mastering houses here in BeanTown.=20

I am familiar with the SSL 2 bus comp sound. How does the Neve compare to that would you say? I might have to check out the Neve and Precision and do an A-B test on different style mixes. I also like to run the 2-bus into my Neve pres for 'that sound' .

To refresh your memory, the Demeter is fairly transparent for a tube box =

but doesn't have the speed to really control wild dynamics. It does =
help=20
glue things together though especially on guitar groups or vocal groups.

As always thanks for the tips!

Tom

>buy a hardware mastering comp.
>Tom
>

It's not easy for me to answer. In my case I do apply "mastering" to =
tracks

if I am sending demos out or occasionally for film work. I do not =
consider

myself a Mastering Engineer (capitalized), even though I do have a few =
mastering

credits. For real album work I send tracks to professional mastering =
people.

For me the goal is to get the tracks closer to "album sound" but not =
to do

real mastering.=20

If I did not have the Portico, I would probably pick the UAD 33609 =
over the

UAD Mastering Compressor simply because I have a slight preference for =

the

"Neve-ish" sound.

The best thing is to try the demos yourself. I do agree that the =

Distressor

is not a good choice for a mastering comp. It's been years since I =
used a

Demeter.

Other good software compressor/limiters I have used for "mastering" =
include:

Sony Dynamics and Limiter

Massey Limiter (Pro tools only) - Excellent! And cheap.

The optional limiter for SawStudio (I forget the name)

Waves L3 Multimaximizer (gets crunchy but is very "Radio")

UAD Fairchild (for effect only)

A step down but usable are:

PSP MasterComp, Voxengo, and Roger Nichols Finis=20

Gene

I choose Polesoft Lockspam to fight spam, and you?

Tom, do you find that the Paris EQ is a little, er... tubby sounding in =
mastering?

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:450f9d86@linux...

Gene and all others with comments,

Is the Neve 33609 even worth the bother?

I want to use the \$50 coupon on a plug. I'm strongly considering the =
Precision Multiband.

If it sounds as good as it looks and functions as simply as it appears =
I think it could make

a difference in my lower end mastering projects (the only ones I do). =
Now I'm using Paris EQ,=20

NoLimit, Paris Comp, but no real pristine compression. The Waves =
multiband is average at best=20

to my ear. That's all I've got around here in higher end software. =
I've delved into the Waves Ren Comp=20

a few times too. It's okay. The Sakis method is too involved for my =
limited mastering hours. I typically

have to get a CD done in less than four hours to make it worth the =
client's/my while.

For \$200 or less is there a better choice for an easy to use multiband =
comp? Otherwise I might spring for the=20

1073 but I have two Neve pres here in hardware form that I track with =
alot.

Is the UAD 140 way better than the SIR plates? If not I'll pass on =
that too.

I'm thinking the Cambridge EQ (just got that and like it) with the =
Precision Multiband Comp would be a=20

fine addition to a sweeter sounding master and even individual tracks =
here and there. =20

All opinions welcome!

Tom

Aaron,
Tubby big time in the low end. I think I'm going to like the
Cambridge possibly in conjunction with the Neve 33609.
The Cambridge seems to have an even nicer top end than=20
Paris. More transparent but still retains character to my ear. =20
I think the low end will be better in a fine tuning way than the=20
Paris eq also.

It's the Neve comp that I know nothing about.
Tom

The UAD-1 precision EQ is a very nice mastering tool, but you've gotta =
feel comfortable with twisting knobs rather than using a graphic =
interface.

Deej

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4510e8de@linux...

Aaron,

Tubby big time in the low end. I think I'm going to like the
Cambridge possibly in conjunction with the Neve 33609.

The Cambridge seems to have an even nicer top end than=20
Paris. More transparent but still retains character to my ear. =20
I think the low end will be better in a fine tuning way than the=20
Paris eq also.

It's the Neve comp that I know nothing about.

Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:4510915d@linux...

Tom, do you find that the Paris EQ is a little, er... tubby sounding =
in mastering?

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:450f9d86@linux...

Gene and all others with comments,

Is the Neve 33609 even worth the bother?

I want to use the \$50 coupon on a plug. I'm strongly considering =
the Precision Multiband.

If it sounds as good as it looks and functions as simply as it =
appears I think it could make

a difference in my lower end mastering projects (the only ones I =
do). Now I'm using Paris EQ,=20

NoLimit, Paris Comp, but no real pristine compression. The Waves =
multiband is average at best=20

to my ear. That's all I've got around here in higher end =
software. I've delved into the Waves Ren Comp=20

a few times too. It's okay. The Sakis method is too involved for =
my limited mastering hours. I typically

have to get a CD done in less than four hours to make it worth the =
client's/my while.

For \$200 or less is there a better choice for an easy to use =
multiband comp? Otherwise I might spring for the=20

1073 but I have two Neve pres here in hardware form that I track =
with alot.

Is the UAD 140 way better than the SIR plates? If not I'll pass =
on that too.

I'm thinking the Cambridge EQ (just got that and like it) with the =
Precision Multiband Comp would be a=20

fine addition to a sweeter sounding master and even individual =
tracks here and there. =20

All opinions welcome!

Hey Tom! You might want to look in to the iZotope 64-bit Studio Processing Bundle for mastering. I think it goes for around \$350.00 street. I've never used it but I have heard good things about it.

http://www.m-audio.com/products/en_us/iZotope64bitStudioProcessingBundle-main.html

I just tried the 33609 comp. It's nice and very
analog/hardware'ish/colored but I don't think I'll die without it.....but
then again, I've got 14 days to fool around with it now so who knows?

;o)
