Ciao,  
Rich

"The world wishes to be deceived." - Sebastian Franck (around 1500 A.D.) Does anyone else see the funny typo in Chris' response. At least I hope it's a typo! ;>)  
Sorry, but when I read it I couldn't help but laugh. Don't feel bad Chris. I type too fast sometimes also.

Tony

"Tom Bruhl" <arpeggio@comcast.net> wrote in message news:42c4c767@linux...  
Pete,  
Here's Chris' response.

Hi Tom,  
If the on board video is shared then I don't think it would be worth while for audio work. I would suck balls for gaming!  
It should be fine for Internet though. It is probably a Via or SIS chip set which can also be an issue. Also the power supply is at best 200 watts and probably not replaceable with a standard atx one.

Chris

I found this post from him a while back:

<http://news.parisnewsgroup.com/cgi-bin/dnewsweb?cmd=article&group=IDEA.EMUEnsoniqPARIS&item=164151&utag=>

....but he says he's never tried it with Paris. I had that mobo penciled in as the one to get, but on a last minute revision of requirements found that it is PCI 2.3, and 2.3 is slightly less 5 volt compatible than PCI 2.2. I am not 100% sure that PCI 2.3 wont work, but I suspect it may not. These

two ASUS mobo's, the A8V and K8V both run PCI 2.2 which is the same PCI rev as my current mobo, so I kn

>Keep in mind that the ASUS PCI architecture has been pretty consistent. If the new card is like my ASUS A7V8X, the it will likely have PCI #2 and PCI #6 hard wired to the AGP. This makes them virtually unusable for audio/DSP cards. PCI slot #4 will likely not be sharing an IRQ with any other slot. PCI #1 will likely share with PCI #5 and PCI #'s 1, 3 and 6 will share with various other onboard components/controllers such as the IDE, USB, SATA, etc.

I'm running 3 x EDS cards on my ASUS A7V8X mobo in PCI 3, 4 and 5. Adding another EDS card or somethinglike a UAD-1 or Powercore would require the addition of a PCI expansion chassis. My Paris rig is extremely stable, but before you buy an ASUS mobo, be sure to find out what PCI slots are hard-wired to what IRQ's.

The ASUS mobo's/VIA chipsets have been extremely stable for me, but they are limited in some ways as described above.

Good luck,

Deej

I currently only have two EDS cards, so I imagine I could get my system running on that board, but I'd like to buy a third and have the option of adding a DSP card like a UAD in the future too, so I'd be dissapointed if I couldn't make audio use of at least 4 slots.

I'll go a looking into this and see what I can learn.

I don't suppose you anyone knows a MB manufacturer who actually does thigs properly and gives you seperate IRQs for each slot, or the option to change them? I guess I'm dreaming...?

Cheers,  
Kim.

>Erghh... the pain...

On the K7V...

According to this website: <http://www.xbitlabs.com/articles/mainboards/display/asus-k7v.html>

"Among the available Setup settings you can find manual assignment of IRQs to PCI slots, multiple memory timing settings, AGP 4x and FastWrites mode enabling/disabling function."

And according to this website: <http://www.ixbt-labs.com/articles2/roundupmobo/asus-k8v-deluxe-k8t800.html>

"BIOS based on AMI 2.51" features include "PCI Manual assignment".

Yet I can't find any such info on the A7V.

When I check the manual for both, both of them say:

PCI 1 & 5 share with Firewire and video  
PCI 2 shares with LAN  
PCI 3 shares with RAID and SATA  
PCI 4 has it's own interrupt.

From the way the manual is written I'm guessing when they say you can allocate interrupts, what they mean is that the sharing is hardwired, but you can make, for example, PCI 1 & 5 & Firewire and AGP all use 10, or 11, or whatever you want, but they're stuck together...

.....erghh... back to the drawing board...

Cheers,  
Kim.

on my desk about 20-30cm higher that they would otherwise be. Ideally inexpensive! They're nearfield monitors (Dynaudio BM5s) so they're fairly small (footprint a bit smaller than standard A4/letter writing paper). Suggestions greatly appreciated.

Thanks,

Danyes Windows 2000 sucks balls to put it in technical terms.:)

Sick with 98SE unless you need to use some app that won't work on it. Other wise use XP Home.

Chris

PARIS should generate Midi Time Code, which the sequencer will lock to. The sequencer will then, from the MTC, generate MIDI clocks for your sound source. This way means you can avoid PARIS Midi, too.

Good luck.

Mike

I'm guessing this wont fit EDS cards. Can someone who pulls their system  
apart often and really knows the size and shape of EDS cards and MBs confirm  
that you will or wont fit EDS cards into slots 1, 2 and maybe 3 on this board...

Cheers,  
Kim.

---=\_linux42c7282e--Thanks for all the thought and help you put into this issue.

I just wanted to play my guitar and now I gotta buy all this stuff...

grrrr

I may still buy the AdrenaLinn and see what I can do with it...

thanks again

Panic

ipset with Paris, or am I  
about to become a guinea pig...? ;o)

Cheers,

Kim. Far as I can tell the only real difference between PCI 2.2 and PCI 2.3 is that in 2.3 they no longer supply 5V to PCI cards. That's the only difference anyone has really named as far as I can tell.

They even still use the 5V slotted PCI connector, and accept 5V signalling, but don't supply 5 volts to the cards.

Seems downright stupid to me, or am I missing something?

Cheers,  
Kim. the 250GB NForce3 if it makes any difference, but any experience would be valued.

Cheers,  
Kim.

---=\_linux42c7dee0--yep... started my holiday a little too early....  
what do you mean put the cap back on, this nectar comes  
in a box my friend.....

if anyone needs a Drawmer DS 201 dual gate, or a pair of  
Genelecs and a subwoofer, there is a studio here in Austin  
that put these up for sale on craigslist. Mind you i don't work at the studio  
or have  
any affiliation, just thought if anyone wanted a nice 4th of July  
present..... good price on the Drawmer gates.

That's certainly true... in the case of my Pharaoh Hound there's a whole 'nother set of issues; if there was a handbook for being one of these dogs, it would read - in part - something like this:

The moment your owner isn't looking, jump the backyard fence and go roam the neighborhood... any fence less than 8 feet high is subject to jumping - remember, your owner put it there solely for your enjoyment & sport, so take advantage of the challenge it presents!

When your owner realizes you're gone & goes looking for you, DO NOT, under any circumstances, pretend you even know him when he tries to call you over... he will get a kick out of your mischievousness & will no doubt enjoy the challenge of this game.

One of the objects of this game is to make your owner get out of the car & try to get the leash on you at least three times once he's found you and is trying to get you back home; you will get three points for each failed attempt on his part. The goal is to score 25 points total - you get one point for each foot of fence jumped, three for each failed attempt to get you in the car, one point for each time you start heading towards him when he calls, then turn & run when something else grabs your attention; plus a bonus of three points for each time you come within 2 feet of the car & then decide to take off again. You may return home or actually get in the car when you've reached 25 points - or get bored of playing, whichever comes first.

When out on one of these excursions, you must always remember

to scare the crap out of at least one young couple pushing a stroller by running up to them at a minimum speed of 30 MPH. Do not saunter up to them casually, as that might give them some kind of clue that you're actually quite friendly. The fun portion of this event is to make them think you're going to eat their baby, causing your owner great embarrassment & forcing him to apologize profusely. Don't forget to lick their baby's face... make sure you wag your tail during this portion of the event, or they might take it as a threat & send you to the pound. In this game you must score 40 points before you can go home. You get one point for each mile per hour at which you run up to the couple, two points if you make the mom cry, five points if you make the dad shit his pants, and three points for making the baby giggle when you lick his face.

When your owner takes you to the baseball field to chase a frisbee, you must be sure to chase anyone who opens the gate & comes in to run around the field for some exercise - once again, DO NOT give any signs that you might be wanting to have fun & join them on their run; you must do your best to make it look like you're trying to hunt them down & kill them. Don't bark or anything like that, because most humans can tell the difference between an excited/happy bark & a mean growl. Be completely silent... that way you: A.) give them no clue as to your intentions if they see you barreling towards them, and B.) You'll freak them out completely if you come up behind them quietly & they suddenly notice you running next to them. You are allowed to run a maximum of one lap with each individual, if you so desire, then you must return to the primary activity of frisbee-chasing.

When participating in the above events, remember that fences at parks & baseball fields qualify as potential things to be jumped, too - that's the reason the city put them there, right? However, since the streets near those areas often have more traffic, jumping them can be dangerous, so you'd be smart not to; but nevertheless, you must keep your owner nervous by eyeing the fences regularly as if you're THINKING about jumping one.

Finally, at least once every couple of weeks, you must steal one object from your owner & hide it... he is most vulnerable in the morning, when he is getting ready for work - a shoe is a good thing to steal at this time, as he will no doubt sometimes make it easy for you by placing the pair he's getting ready to wear on the floor, or perhaps on the bed, on the ottoman, etc. It doesn't matter that you know he has to leave shortly... after all, you've got all day! Just grab the object the moment he's

not looking, and hide it... taking it out of the room completely is best, but sometimes you can get away with simply stuffing it under the bed - at which point you are required to sit there looking up at him & wagging your tail; this conveys the message that "it's game time again"! Other good things to steal are:

\*\*A screwdriver, when he's working on something & sets it down next to him.

\*\*A sock, when he takes some clothes out of the dryer & one falls & he doesn't notice. Do not chew on it, however; that sort of thing is for other breeds.

\*\*The TV remote.

\*\*Important paperwork, such as the phone bill. Unlike articles of clothing, paperwork may be chewed upon.

\*\*Any quantity of food that is placed on the counter that exceeds the number of people that the meal is being prepared for - after all, if it's extra, it must be for you, right?

Don't be a pig, only steal a little bit - that way they may not notice it. Also, don't forget to be picky... for example, raw chicken is good for you but cooked pizza is not.

:)

While all of this is true, his counter-surfing behaviour is pretty weird. My daughter is the one who'll leave stuff out on the counter & forget she put it there - one day he grabbed a piece of chicken that she had set on a plate after washing it, then walked away. He could've easily taken & eaten all four pieces, but he only grabbed one. Another time, she left half a pizza on a plate on the counter, then left for work after she ate - he didn't touch a single piece & it was there for at least four hours until I got home.

Strange dogs.

NeillInteresting.

All I need to do is record MIDI from the AdrenaLinn during the pass while tracking drums from it, then output the MIDI to clock the AdrenaLinn while tracking guitar.

Questions

Does FreeMidi/OMS follow Paris with SMPTE TC? How is this implemented under Paris?

Where do you get it FreeMidi/OMS?

How do you get the MIDI in and out of the Mac and record it while tracking?

thanks

Panic

Funny, the first thing I put on this morning was to rip one of those Joan  
Osborne CD's you sent me. It sounded so wierd that I figured the rip had  
corrupted. Beware the MEC. It sits there and generates 48kHz timecode no  
matter whether the computer it's hooked up to is on or not. If another sound  
card in another computer is hooked up to it, it's gonna' be chipmunk time.

;o)

Hehe... ah, what a worry. ;o)

Cheers,  
Kim.Yo Gene!

I remember you saying that you were doing this because you wanted to run some stuff on the master bus... applied to the whole mix.

Is it possible to do this and still be able to use your solo buttons in the first box?

I am set up like this....

i have an external insert loop setup on the global master. it is routed to channels 1 and 2 of my RME card. the output of channels 1 and 2 (RME) is routed back to the global master insert... and the loop is complete.

now when i set up a track in SX... and hit the monitor switch... and can hear the mix with native plugins across the whole mix.

problem is.... the solo buttons don't work.... when i solo something i hear nothing. i guess this is because of how everything is looped.

anyways.... Gene... you have mentioned that you do this... so i am curious how you set it up.

anybody else can certainly chime in as well.

thanks,

JeremyChris Ludwig <chrisl@adkproaudio.com> wrote:

>Hi Kim,

>Overall I've had the best luck with the Gigabyte K8NS-Ultra 939 for  
>audio apps. Haven't tried it with Paris though. It is a very stable board.

Yes, I remember you recommended this board to me a while back. I had it pegged as my new board, but as it turns out that board has PCI 2.3, and I'm 90% sure that Paris EDS cards wont run in anything past PCI 2.2. Hence I've had to look elsewhere. PCI 2.2 is the last one to fully support 5V PCI cards, and I'm pretty sure that's what the EDS card is.

Until I worked that out, that board had my name on it.

Cheers,  
Kim.

Gamma Electronics):

<http://www.bedini.com/base.htm>

It B.A.S.E.-ically :) would allow you to do enhanced stereo to  
the extent where you could place things well outside the  
speakers... There was an album called "Storm Alert" from a  
thrash-metal group called Torture that I engineered I did,  
called Torture... though it's not something I'd say was a great

production overall (OK, I guess for the genre it might have been appropriate at the time, but IMO they wanted it very much "rough-edged", and it coulda been a little more polished & it wouldn't have hurt), there were a few cool "Bedini moments" - for example, the drummer had one of those enormous kits with like 8 toms - when he did a roll across all or most of them (using the Bedini unit across the mix) it sounded like they would come from behind you & up above in the back corner of the room, to across the front downward at an angle, and finish up in the opposite lower corner of the room back behind you again. This is just with the two regular front stereo speakers, BTW; not surround sound of any kind. Neil Kernon recently did a remix of that album (I guess they have a strong enough cult following to justify a re-release of

I just tried to check it out amd Paris wont start saying there is no interface  
connected.

I'd love to hear the difference, as I am using wordclock now.Hey Rick,

I'm 970-375-7081

Give me a call.

Deej

a friend of mine has a Roland RD-600 where one of the keys doesn't rebound.

I'm sure it must be something simple. I should try a little harder to get  
it open an
