Send me an "E" off the group with your PayPal info and shipping charges. My zip code is 81301. UPS ground will be fine. Also, I need to be sure that the IF2 port is working on this MEC. It's \*got\* to work. Any way to test it?

Thanks,

Deej

type of track and the vocal, although it was recorded fairly well[not by me...:-)]has a few frequency warts here and there, mostly low mid proximity stuff. I had it sounding pretty good with conventional compression/eq, but just for grins I took those off and put the Multiband on it. I freaked out!

I've used multibands before, (Waves linear, and DB)but this just made me not believe what I was hearing. It sound really natural and evened out the vocal in a really pleasing way. I'll probably go to bed and check it in the morning, just to make sure I'm not crazy, but I'm loving this thing.
