Subject: write me a vst metronome :-)
Posted by John [1] on Mon, 08 Dec 2008 20:25:01 GMT

Can anyone write me a VST metronome that simply plays 1 wave file in sync
with my cubase tempo? I just want it with a radio button that allows me
to have it play on bars only or all beats except the bar.

This way I can have two channels, one with bars and one with beats that I
can control the volume of.

Sound be easy yes ? I got $10 !!

Thanks !
John

John,

Try Mike's metronome for Paris.

Tom

Does it sync to Cubase's tempo? Is it free? Where is it ?

Thanks,
John

Hi John,

I've never tried it so I can't say how adjustable
the number of clicks per bar is. Mike Audet would know though.
http://www.ensoniq.ca/metronome.html

It is $20.
Tom

Works great here !!
I wish only if we could change the sound of the click ,menaing having more
choices as how the click can sound !!
It deserves the money spent and Mike deserves to get paid !
If we want to keep him posting here new things for Paris we need to support
him !!!
Dimitrios
