Hello all,

sorry to post possibly simple questions, but I'm a bit confused,

Can Paris 2.1 record in 24 bit wav files?

Currently I can only record and export 16 bit wav files or 24 bit PAF files,

do I need a better driver? (ie. Mike's driver)
or do I need Paris 3.0?

I guess by the sound of it I should wait for Mike's new Driver that does 64 bit?

Thanks for your help,

Tom
