New thin MacBook Air just announced. www.Apple.com
The track pad is multitouch now. Optional solid state drive. A bit slower CPU than the other MacBooks but not bad.

It looks pretty cool for something that light. But right now I need a heavy lifter 17" HD res box, so it's not for me.

Also at MacWorld: Software updates to iPhone/iTouch, movie rentals, a wireless backup system, and an iTV update.

No refresh for the other laptops (what I'm waiting for) yet. Dang! I guess they'll sneak that update in sometime between now and NAB, much like they did with the MacPro last week with little notice or fanfare.

I'm expecting LED backlighting on the 17", updated CPU and chipset for more speed and battery life, and now I'm expecting a multitouch track pad! Hope it doesn't take months...

Cheers,
-Jamie
