donI remember awhile back there were a couple of you that were talking about studio management software. A friend of mine has a voice & piano studio, and she's looking for some software for mainly basic accounting purposes (for which purposes, Quicken or something of that ilk would obviously work just fine, and also don't cost very much), but I thought if there was a package that would handle accounting & things like scheduling, etc. in the same bundle, that would be even better.

I'm going to cruise around the web to see what's available, but if any of you know of any apps that do this sort of thing, and are reasonably-priced or perhaps even fall into the freeware/donationware/shareware category, please let me know. (e-mail is: neil.henderson-AT-sbcglobal.net, or just post the info here).

Thanks!

this time, was my new clocking device. WOW. Much more clarity. The top end  
is much more defined, and the bottoms are almost tighter. Reverbs are easier  
to fine tune. I know these descriptions are text book symptoms of external  
clocking, but it is very apparent in my studio. I tried a genx clock last  
year, via the BNC cable, and wasnt blown away. This time im clocking via  
the Sdif input from a Mindprint unit. Awesome..... Im sure Ill find more  
sonic advantages as time goes by.

Yes, all the problems of the world are our fault - we suck. We  
absolutelty do not have the right to defend ourselves or  
retaliate for an attack on our soil. We should just let everyone  
else treat us as they please, murder our citizens at home &  
abroad, and pretty much anything else they want to do. How dare  
we feel as though we should have any rights to defend our  
contrymen, our allies, or our way of life?Is your mom's last name Baldwin?

being done by errrr.....them?

I've got a version here. Haven't had much time to get my head around it but  
it looks pretty cool.
