Sorry guys, this is probably been done to death, but how do you reset the VST path to go nowhere? I want to make things a little quicker on bootup by not having Paris look at VSTs since I am doing all my mixing in Nuendo and doing a final sum and vocal ride in Paris.

I go to 'Set VST path' in the menu and it directs you to an explorer window with an 'open' button, however there's nothing to open ie. it doesn't respond to opening a folder. I guess I could go back and RTFM but maybe its changed under XP.

David.

I think you can edit your Paris.cfg file and set it to:

```
VSTDirectory=
```

instead of

```
VSTDirectory=C:\vsts\  
or whatever you had.
```

I don't have any VST entry in my config. file. But I'll put that in and give it a shot. Thanks.

Thanks John. That did the trick. With DX plugs and VSTs disabled it loads in about a quarter of the time.
