Anyone know if I can use my old Midiman Biport on my Ibook with a Serial/USB converter. I'd just like to get a Melotron soft synth and control it with my K2000.

If not, what would good simple USB midi interface should I look at?

Tanks all,

Hi Cujjo,
The M-Audio USB Midisport 2x2 or 4x4 work fine.
The serial to usb adapter don't work with the Biport.

Ah bummer.

Tanx.

Chris,

I have a Midisport 2x2 laying around you can have.

Will try to remember to bring it to tomorrow's session.
