I don't know how many users other than Lamont and I are using Nuendo, but N4 was just released - shipping in early October:

Highlights:

- * New automation system (complete automation panel): new modes include the ability to only write from an point, leaving previous sections absent of automation (Virgin Territory option); fill modes, preview mode, and much more. Looks like automation is about 15x more powerful than it was before.

- * New key commands for Cut head/tail, selections (great for post)

- * Free routing: any group or fx to any other, plus post fader routing

- * Media Bay (I hear it's enhanced from Cubase 4 and works quite well for an FX database - also great for post)

- * VST3 - all included plugins are VST3 (biggest post advantage is automatic adapting to multichannel configs - Flux plugins already do, but now VST3 plugins and Nuendo's stock plugins will also).

- * New logical editor looks much more powerful

....etc...

I'll let you guys read the rest from Steinberg if interested.

For post this is a great release - the new automation and key commands alone are worth the \$249 upgrade - free routing will be a big boost for me as well.

Regards,
Dedric
