Subject: an essay test: web hosting--what are you using?

hey, Parisians-

It occurs to me that after having my website up for nearly 10 years on a
local server I should bite the bullet and get my own domain.

Exploring this option has opened my eyes to what exists in the cyberworld
in the way of web hosting companies that offer your domain and apparently
a zillion other features, most of which I've never heard of.

I know nothing of Pearl scripts or CGI (other than what they are), but I
do HTML well enough to have thrown my own site together over the years. The
servcices I've been looking at mention everything in the world except HTML...

So, the question is, what are you guys (and gals) using? How satisfied are
you with the service and features? How much is it costing? Is your site strictly
personal, or business, or both, or what? Are you using an ISP, or a server
in your closet?

thanks for your time and experience
