Hi there !

Someone got a copy of the SMPTE CARD Manual ?

The system don't run with a midixpress XT (Parallelport (SUB D 25)) as slave. Try to sync a second PC with Cubase 4. Don't no the right config of Paris SMPT Card.

THX

Dan

I missed this - the SMPTE manual is inthe Wiki here:

<http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=Paris ReferenceLibrary> - but Mike has updated and improved the SMPTE card driver which may have changed (improved) functionality.
