
Subject: Question for Guitarists (or guitar-recordists)

Been thinking about picking up a new guitar processor (or perhaps even a new amp, just for some different tones & colors, and MAN there's so much stuff out there! Haven't been shopping for anything like this in awhile, so I was wondering if anyone has any items of this nature that they've found they really like?

Not looking for any wild & crazy EFX, necessarily, but if it has that too, that's fine.

Any comments on:

**Line6 Tone Port UX2? I saw someone posted something about that setup here a week or so ago... how's that working out?

**Any other Line6 stuff? I tried one of their Spider combo amps a few months back, and it seemed OK for what it did.

**TC Electronics rackmount guitar processors?

**Any floormount multi-EFX thingies you're using that really rock?

**Any new amps you've heard that blew you away?

Not really interested in the Variax or other guitar-modeling stuff - I've got enough of a variety of guitars, it's just the stuff to run them through that I'm interested in.

TIA!

Neil
