No too old of a VST version.

Been trying the demo in Cubase 4 so far it works great.
Very easy to use compared to the other ones I've tried.

I'm interested, too. They also have a deal that if you have a receipt for a copy of AutoTune, they will give you \$100 off the normal \$299 price--you just have to scan and email them the receipt...

KEWL!

Neil

<Wondering if he still has his receipt for Auto-Tune!!!!>

:D

that sounds dirty!!!!

for it to potentially work fine in Paris it would be pre- VST 2.1. Some
newer ones may work depending on whether they rely on some of the newer
SDK to do there mojo.

Nice gutter mind there Chris ;-)

I've got a version 1. something-or-other...would that be too old

Hi Don,
yes more than likely it will be. version 2.4 is the current. The 3.0

version of the VST spec just got introduced in Cubase 4.
