Neil,

Is this your new set? Looks nice! Interesting overhead mic placement.

Excuse my ignorance. It looks like the overheads (at least the SDCs)

are addressing the wall. Tell me more!

Nice photo. And the track sounds good too.

Tom

that's the cleverest drum machine decoy i've ever seen. have you
tried one ovh centered over the toms/snare about 3 feet up and the
other about 3 feet to the left of the floor tom 6" to 1" above the
head pointing toward the kit?

Neil,

Sounds good.

Am I hearing this right and almost all of the instruments
are panned center with stereo delay and reverb applied?

--

Oh hell.....I haven't listened to the track yet. I was just looking at the picture of the cymbal kit with the various drums scattered around underneath.

Tom, yeah, that's my new kit... it's a Yamaha set I picked up at Brook Mays' big going out of biz sale.

As for the mics, both sets of OH's are basically in an ORTF pattern - aimed right at the corners of the room... the mics not as close to the kit as it might look in the pic, they're about 3 feet in front of it.

Hey, Rick... no I've never tried that setup, though I've heard of people having success with that sort of thing - I prefer regular stereo mic'ing for OH's & the like. I ought to try it sometime, though just for the helluvit.

Oh, and I forgot to mention, the SDC's are panned opposite from the TLM-103's in the mix, and at a slightly lower volume level.

Brandon, no not at all... there's not much panned dead-center, in fact. All the keys except for the solo synth parts are stereo, the rhythm guitars are all double-tracked & panned L&R, same for the toms & OH's - BG vox aren't hard-panned, but there's like 4 tracks of 'em, and they each have a few degrees of spread; the HiHat is very slightly to one side, too. Kick, snare, bass, lead vox & solo guitar & synth are about the only things center-

panned.

So do you have all the spot mics panned center and just the room mics panned wide?

No, the kick & snare are centered, the hat's close, but not "quite" centered, and the toms are all panned in an array... check the tom fill at about 1:08, for example... if you're not hearing them going from one side to the other in that fill, then you're listening in mono or something.

Ah, must be something funky with the .mp3 compression / center cut filter.
When I listen to just the center material I hear more toms than
when I listen to the left and right sources.

it's actually the ohv set up for the stones. i wouldn't use it on heavy rock but you can pretty much use that and another mic on the kick and snare for a 4 mic set and have some excellent drums.

Nice looking kit, Neil.

More cymbals=good. When I put up my whole kit I have three crashes, two
splashes, crash-ride, ride, trash, china, hats. I can pare it down as
necessary but it's fun to have 'em all up.

Cheers,
-Jamie

Strange. COULD they be out-of-phase? Because I've listened to the mp3 on 3 different systems now, and I'm not hearing anything like what you're describing.

Or, do you have them set up for some type of pseudo surround-sound thing & it's messing with the phase somehow?

I dont think so.

I wouldnt worry about it.

It sounds good.

These are by no means audiophile speakers.

There doesnt appear to be any processing on the signal from my sound card.

If I get a chance I will listen to it at the studio so I can hear what it really sounds like.

Nice kit. Also love the song - and this mix has plenty of bottom end, which gives it a lot of power. For my taste, a lot of prog has what I call the "Mike Stone Effect" - everything below roughly 150Hz seems to be rolled off.

This one is plenty ballsy. I like it. Y'all got a followup to "Big Buildings" coming soon?

And by the "Mike Stone Effect", I mean just listen to the first two Asia albums and Whitesnake's followup to "Slide It In". "Slide" was produced by Martin Birch, a guy who knew how to get that sound. "Whitesnake" was produced by Stone, who completely glossed up and neutered the whole damn thing.

I would pay good money to have anyone else remix the first two Asia albums, since I know Wetton's bass is in there somewhere. And they had Carl Freakin' Palmer on drums! Apparently without a kick...

I'd love to hear more of the new stuff when you feel like doling it out, Neil.

Yes, finally! Now that I can do it right with real drums (or "better", at least LOL).

Thanks for the compliments - I'm pretty happy with the way that one turned out - a few mix tweaks & maybe a drum edit or two & it should be there. Started working on replacing the e-drums on another tune last night - trying to work out the parts.

I agree Paul. I loved the songs on those Asia albums, but they sound like complete crap! I also think in general, they were way to reverb heavy. I would love it if someone would do a good "proper" remix.

Cool! If all the mixes have the low-end grunt like this one, it'll be one hell of a sophomore effort.

Put me on the list for a copy.

Yep.

I'm sure part of it was Downes as well...

I saw them on the first tour. They played a new song they'd been working on called "The Smile Has Left Your Eyes".

Wetton doing just vox. Palmer standing up front playing a simple pattern on some sort of drum machine (based on the era, probably a Linn), Downes playing piano, and Howe playing acoustic.

Simple, beautiful. Stunning song. Couldn't wait for it to be recorded.

Then "Alpha" got released, and I was shocked. Saddened. Infuritated.

"Smile" had become a bloated, overblown, overhyped, overproduced, overorchestrated piece of keyboard-and bell-laden bombast. The stunningly simple song I fell in love with was completely gone. Never forgave them for that.

Too bad bootlegging technology of the time involved sneaking a tiny cassette recorded under your coat - in the current era of DAT and CF recorders and hi-performance condensers, I'd pay good money for a copy of that concert.
