Hi all

I have 3 sets of new skins completed., minus the Transport and Editor. Here are full res screen captures so you know what you would be staring at for hours.Kerry discovered a new resource editor that allows the panels above the auxes to be skinned, it turns out the old editor was the culprit. These will be uploaded to the Wiki when Kerry can get to it. New instructions will be posted too. The new program is sooo much easier. Click existing BMP click replacement BMP and then OK and move to the next. Then save changes. Only takes a couple of minutes.Here is the new editor, and some eye candy.

I believe that is indeed Edmund's cat. The picture was included as an Easter Egg (was it v 3.0?) and was accessed by a particular combination of commands (I forget which).
