Hello Everybody,

I am trying to finish a project on my Paris System and I am really getting frustrated working with one eds card and one c16 controller. I am looking to add at least another card and a black controller so I can work a bit more efficiently with less headaches. Is their anyone out there in need of getting rid or considering to sale their paris gear? If the price is right I will purchase both and even give you credit on the CD/Inlay

Thank You

Ike
