I can;t seem to trust Nolimit on the Mix bus as it always gives me a very
flat looking WAV.

>TyroneNot knowing what the guy's guitar sounds like, or the context
of the music, I would say - just for the helluvit, start with:

a.) The SP-87 at about a 45 degree angle back from the bridge,
and...

b.) One of the KM-184's or C460B's aimed straight-on at the
12th fret.

Try the Great River or the Forsell on the "12th fret" mic, and
you have an Avalon 737, dontcha? Use that on one the SP-87 with
just a teensy bit of compression & lo-end rolloff.

It ain't gonna suck, I'll tell you that much!

I use compression when traking a number of things, including vocals. I think that, like a good electric guitar amp's tone, it can have a huge influence on the performance. A singer, hearing compression in the cans, can start to sing in such a way as to "play" the compression. Just my experience. And this does not give you a block
