o yeah !!! Good good.  
About your question for comp setting:

<Dear Zmora just playing around with some tracks I recorded.

Regarding the settings someone can achieve great compression sounds with percussive sounds.

You can raise the release just a few nS

You can put 0.00005-9, yes only that low because after that the sound becomes harder to fit your needs, I guess...

A great new snare drum setting for EDS compression is:

Threshold :-96  
Ratio 2.70:1  
Attack 1.80  
Release 0.00008  
Lookahead 0.003  
output 15.8

Regards,  
Dimitrios>

Tom, try to move knobs and surely you will find good setting.  
Depens on instruments,  
this one "Dimitrios LA-2" is good basic for start.

Cheers

Zmora

Rich

Try this for el.git:

>Threshold :-96 or less

>Ratio 1.25:1

>Attack 0.080

>Release 0.00040

>Lookahead 0.004

>output 6.5 or more

or try to improved it

Zmora

---

yeah he is, bit I am still waitng on my free U47!

Speaking of paris plugs though, I am having an issue with the paris gates. And this may be a newbie one, but it is regarding gating snare which I don't often do. Anyway, at zero lookahead, the gate is still effing up the phase on my drums, how many nudges and sample slides do I need? (this is a song on a tribute comp and I really want t gate the snare like to original)

o

Thanks and over and out!

Hello to everyone.

Thank you for your kind words ,here !

Regarding vocals try this and tell me how it sounds to you!

Threshold -51.8 (until it shows -18 and more gain reduction)

Ratio: 2.70:1 (magic number ?)

Attack 0.24

Release 0.0042sec (you need at least three zeros before any number here !)

LOOKAHEAD: 0.020 (WELL YOU CAN GO AS LOW AS 0.03 TRY AND SEE WHAT YOU LIKE)

output: 15.7 db

Cheers,

Dimitrios

THANK YOU - you guys are so helpful and willing to share!!

Are you using no limit at mixdown or are you using something like sound forge and wave or other plugs to bring levels up. I have a TC multi band I've been using on/off also... just trying to stream line to process some...

Subject: Re: Dimitrios -any hot eds comp settings for vox,git,bass?  
Posted by [Dimitrios](#) on Fri, 14 Apr 2006 19:08:50 GMT

---

Hi,  
Regarding the eds compressor and vox please use this as a starting point  
for further search.  
I think it is very good for vocals.

Threshold: -96  
ratio: 1.25:1 (raise until you get -12-18 gain reduction)  
attack: 0.082  
Release 0.00006 sec  
Lookahead: 0.005  
Output: 10.9

What I found is that -96 and release with FIVE ZEROS is the must starting point.  
Then you just raise the ratio until you get over -12 db (-16 is fine) gain reduction.  
Then you work with attack until you get a stable compression response but around 0.082 is fine.  
Output raise until you get same level in out...

So please disregard my previous compressor suggestion for vox, was a little bit fast...  
Regards,  
Dimitrios
