LOL!

Thanks for the detailed response Rod, very helpful as always. I think I owe you dinner by now or something.

Craig Mlt's a limitation of the hardware. They didn't do it because they thought it was a good idea.

Here's some work around ideas.

1. Put only drums on one of the subs, then just mute the other subs in the Global window.
2. Set up a group with all the other instruments and mute that, one mute (per submix) gets rid of everything.
3. AND THE WINNER (I think) Send all your drums to an unused aux, select stereo for that aux, don't select any effect for that aux. Now you can solo the send for that aux and hear all your drums! Kind of a secret "solo" group function.
Rod

Hmmm, interesting... I'm not sure I understand why that is, but then again,
the things I don't understand sure outweigh the things I do!

Wonder if that's like the eight card limit...

ernal) do you know
to sync perfectly to Paris via adat 9-pin?.

Thanks Muchly.

P.S. I'm still using '98SE on the Paris box, but may go to ME soon.
My toyings with XP haven't been too gratifying. I have one adat card.Thanks man, didn't know that.

>>Greetings. I have a Motu 828 MKII, and up till now it has been working fine. Yesterday I purchased a Digimax LT, hooked up to the Motu through the adat lightpipe. To get more inputs channels.

I do get an output using the Digimax and the Motu, the problem is that the input appears on 6 channels. I'm using nuendo software, and something strange is happening with routing.

I decided to bypass the computer totally, and input just on the Motu input (guitar in 2), and even on this setup, I'm getting input on that channel, plus input 1 and 2. Well according to the input lights I am.

No idea here what's going on. Why would I get multiple inputs with only one input active. ROUTING!

If you have any ideas, it would be most appreciated.

Also, what's the connection between Cumix Console and the routing in DAW software. Does one supercede the other?

Thanks in advance.Kim,

My Dakota quit syncin
