Has anyone had trouble with the UAD v 4.5 software in Paris with XP?
I had some latency issues and reverted back. It may have been something I did wrong at my end though. =20

How does the Helios eq compare to the Neve 1081?

I'm considering one of the two in the next few days before the sale=20 runs out. I own a few Neve broadcast modules that are akin to the 1073 so I'm not lusting after more of that. I really like and use=20 the Cambridge too. What would compliment those flavors best remaining in Paris? I use Precision 8 pres mostly with a smattering of Tele V72 here and there. Projects run the gamut - mostly pop, hard rock/metal and acoustic. Some synth/orchestral too.

Thanks for sharing your experience,
Tom

Tom...latency on UAD 4.5 software is the same for me, so it must be something you did. I'm loveing all the Neve stuff, especially the comp. The only issues I've notice is a "application" error window on closing Paris. This only happens occasionally. I can't say for sure it's the new UAD software, but that's right about when I started noticing it. Very minor inconvienece, considering the quality of the plugs.

I really like the 1073. Lots of character. The eq points seem to work real well for drums. The 1081 has more eq points, more flexible, same overall character though IMO.

 on UAD 4.5 software is the same for me, so it must be something
you =
did.=20
 I'm loveing all the Neve stuff, especially the comp. The only =
issues
I've=20
 notice is a "application" error window on closing Paris. This only=20
 happens
occasionally. I can't say for sure it's the new UAD =
software, but=20
 that's
right about when I started noticing it. Very minor =
inconvenience,=20
 considering
the quality of the plugs.
