Thanks for the input.

If I'm following your idea correctly I'm not sure how it will work.

The thing with my planned setup is that it revolves around two Akai MB76 programmable mix bays. Basically these are simple mixers with 7 ins and 6 outs (or do I have it backwards?) and basically you can feed any input, in any amount, to any output bus, and have 32 patches preconfigured to do this in different ways. Your idea of the monitor mixer works well for most keyboard or multi-instrument players, but I'm trying to take live re-patching of effects loops to an extreme. A regular mixer is a static thing. I want to be able to switch any instrument into any effects loop in a split second with just my foot. I can't see how I can do that without these Akai units (or something similar) and struggling to work out how I could hook in a monitor mixer while still using them effectively... and even if I could do that, I'm struggling even more to work out how to do it while feeding recording devices.

I'm pretty happy with my planned system as far as what I will feed to a PA goes, other than I'd like more busses for more stereo sounds, but I'll just need more Akai mix bays for that.

I could be missing something, but I'm thinking due to the complex plans I

have for live patching of things, that a monitor mixer wont be of much use.

Am I missing something, or had I just not properly explained what I'm trying to do... ...not that I've explained it properly still... ;o)

Cheers,

Kim."Neil" <OIUIOU@OIU.com> wrote:

>Couple of used ADAT's ganged together? Akai DR-16?

Mmm... both nice ideas. I hadn't thought of ADATS. Would work magically if I had a Paris ADAT card to transfer with, but I might be happy to justify that. I'll keep that idea in mind.

The DR-16 looks like a really nice box. I saw one went recently over here for around \$1100 which isn't bad for a box that does 16 tracks of 24 bits. Was hoping to be more skimpy than that but it's a nice looking box to be aware of in any case. Any idea of what would be involved in getting sounds off the box and on to Paris?

Thanks for the input.

Cheers,

Kim."Aaron Allen" <nospam@not_here.dude> wrote:

>gotta get put out. However, my model includes the adat HD recorder.

Just looked them up. Does look beautiful I have to say. A bit more than I was hoping to pay really though, but for 24 tracks of audio in a single 2RU rack with decent convertors, that is a good deal.

It goes on my wish list, but unfortunately I don't think it will come to be in the near future...

Cheers,

Kim.thanks aaron for putting my balls into a lesser place: pride has replaced with disappointment.

it very useful for location recording. I am not up on all the latest disk recorders, but at the time, I compared the Fostex with all its competition, and it seemed to be the only unit that allowed me to record many tracks, then extract them WITHOUT rendering as a collection of WAV files. I use an external Zip drive, but you can also hook up a CDR to dump data.

Most of the other units expected you to mix and master completely within the unit then render a stereo pair as output. Otherwise, you would have to send all your tracks in pairs to your PC and worry about sync issues afterwards.

The VF16 I have allows me to record up to 24 tracks, in 8-track submixes. The first 8 tracks are addressable via the I/O. The next 8 are via ADAT connection (giving you up to 16 simultaneous), and the last 8 are a "parking lot" to store tracks. I found it easy to record the first 8, then send them to the parking lot, then record the second 8, sending them to the ADAT channels, then record the last 8. In the end, I have 24 tracks to transfer to the PC for mixing and whatnot.

I think these can be found on ebay pretty cheap.

al execution upon its opponents, the scale of anarchy now existing in Baghdad, Mosul, Basra and other cities is unprecedented. "The July figures are the largest ever recorded in the history of the Baghdad Medical Institute," a senior member of the management told The Independent.

It is clear that death squads are roaming the streets of a city which is supposed to be under the control of the US military and the American-supported, elected government of Ibrahim al-Jaafari. Never in recent history has such anarchy been let loose on the civilians of this city - yet the Western and Iraqi authorities show no interest in disclosing the details. The writing of the new constitution - or the failure to complete it - now occupies the time of Western diplomats and journalists. The dead, it seems, do not count.

But they should. Most are between 15 and 44 - the youth of Iraq - and, if extrapolated across the country, Baghdad's 1,100 dead of last month must bring Iraq's minimum monthly casualty toll in July alone to 3,000 - perhaps 4,000. Over a year, this must reach a minimum of 36,000, a figure which puts the supposedly controversial statistic of 100,000 dead since the invasion into a much more realistic perspective.

There is no way of distinguishing the reasons for these thousands of violent deaths. Some men and women were shot at US checkpoints, others murdered, no doubt, by insurgents or thieves. A few listed as killed by "blunt instruments" might have been the dead of traffic accidents. Some of the women were probably the victims of "honour" killings - because male relatives suspected them of having illicit relations with the wrong man. Still others may have been murdered as collaborators. Doctors have been told that bodies brought to the mortuary by US forces should not be given post-mortem examinations (on the odd ground that the Americans will have already performed this function).

So many civilians are dying that the morgue has had to rely on volunteers from the holy city of Najaf to transport unidentified Shia Muslim dead to the central city's large graveyard for burial, their plots donated by religious institutions. "In some of the bodies, we find American bullets," a mortuary attendant told me. "But these could be American bullets fired by Iraqis. We don't know who's killing who - it's not our job to find out, but civilians are killing each other.

"W

> pale-yellow brick medical centre where the authorities keep their computerized
> records. So many corpses are being brought to the mortuary that human remains
> are stacked on top of each other. Unidentified bodies must be buried within
> days for lack of space - but the municipality is so overwhelmed by the number
> of killings that it can no longer provide the vehicles and personnel to take
> the remains to cemeteries.
>
> July was the bloodiest month in Baghdad's modern history - in all, 1,100
> bodies were brought to the city's mortuary; executed for the most part, eviscerated,
> stabbed, bludgeoned, tortured to death. The figure is secret.
>
> We are not supposed to know that the Iraqi capital's death toll last
> month was only 700 short of the total American fatalities in Iraq since April
> of 2003. Of the dead, 963 were men - many with their hands bound, their eyes
> taped and bullets in their heads - and 137 women. The statistics are as shameful
> as they are horrifying. For these are the men and women we supposedly came
> to "liberate" - and about whose fate we do not care.
>

> The figures for this month cannot, of course, yet be calculated. But
> last Sunday, the mortuary received the bodies of 36 men and women, all killed
> by violence. By 8am on Monday, nine more human remains had been received.
> By midday, the figure had reached 25.
>
> "I consider this a quiet day," one of the mortuary officials said to
> me as we stood close to the dead. So in just 36 hours - from dawn on Sunday
> to midday on Monday, 62 Baghdad civilians had been killed. No Western official,
> no Iraqi government minister, no civil servant, no press release from the
> authorities, no newspaper, mentioned this terrible statistic. The dead of
> Iraq - as they have from the beginning of our illegal invasion - were simply
> written out of the script. Officially they do not exist.
>
> Thus there has been no disclosure of the fact that in July 2003 - three
> months after the invasion - 700 corpses were brought to the mortuary in Baghdad.
> In July of 2004, this rose to around 800. The mortuary records the violent
> death toll for June of this year as 879 - 764 of them male, 115 female. Of
> the men, 480 had been killed by firearms, along with 25 of the women. By
> comparison, equivalent figures for July 1997, 1998 and 1999 were all below
> 200.
>
> Between 10 and 20 per cent of all bodies are never identified - the medical
> authorities have had to bury 500 of them since January of this year, unidentified
> and unclaimed. In many cases, the remains have been shattered by explosions
> - possibly by suicide bombers - or by deliberate disfigurement by their killers.
>
>
> Mortuary officials have been appalled at the sadism visited on the victims.
> "We have many who have obviously been tortured - mostly men," one said. "They
> have terrible burn marks on hands and feet and other parts of their bodies.
> Many have their hands fastened behind their backs with handcuffs and their
> eyes have been bound with Sellotape. Then they have been shot in the head
> - in the back of the head, the face, the eyes. These are executions."
>
> While Saddam's regime visited death by official execution upon its opponents,
> the scale of anarchy now existing in Baghdad, Mosul, Basra and other cities
> is unprecedented. "The July figures are the largest ever recorded in the
> history of the Baghdad Medical Institute," a senior member of the management
> told The Independent.
>
> It is clear that death squads are roaming the streets of a city which
> is supposed to be under the control of the US military and the American-supported,
> elected government of Ibrahim al-Jaafari. Never in recent history has such
> anarchy been let loose on the civilians of this city - yet the Western and
> Iraqi authorities show no interest in disclosing the details. The writing
> of the new constitution - or the failure to complete it - now occupies the
> time of Western diplomats and journalists. The dead, it seems, do not count.
>

>
> But they should. Most are between 15 and 44 - the youth of Iraq - and,
> if extrapolated across the country, Baghdad's 1,100 dead of last month must
> bring Iraq's minimum monthly casualty toll in July alone to 3,000 - perhaps
> 4,000. Over a year, this must reach a minimum of 36,000, a figure which puts
> the supposedly controversial statistic of 100,000 dead since the invasion
> into a much more realistic perspective.
>
> There is no way of distinguishing the reasons for these thousands of
> violent deaths. Some men and women were shot at US checkpoints, others murdered,
> no doubt, by insurgents or thieves. A few listed as killed by "blunt instruments"
> might have been the dead of traffic accidents. Some of the women were probably
> the victims of "honour" killings - because male relatives suspected them
> of having illicit relations with the wrong man. Still others may have been
> murdered as collaborators. Doctors have been told that bodies brought to
> the mortuary by US forces should not be given post-mortem examinations (on
> the odd ground that the Americans will have already performed this function).
>
>
> So many civilians are dying that the morgue has had to rely on volunteers
> from the holy city of Najaf to transport unidentified Shia Muslim dead to
> the central city's large graveyard for burial, their plots donated by religious
> institutions. "In some of
