Hey folks, I have moved onto a firewire/reaper setup and using that exclusively in my home studio now and I am gonna start parting out with most of my Paris stuff.

First...

I have two Paris EDS1000 cards that I bought about a year ago off a guy from Colorado Springs. I purchased them for expansion of my one card system, but never done that and I never even opened the box. The guy said the cards were used, but worked perfect. But again, I never opened the box tho I trust him that they are fine... and I don't think the cables are in the box, so it is just the two cards.

I am open to offers, but would like to get \$300 for both cards (I paid way more than that). I am not really in need of too many studio components, but again, if something strikes my interest, offer away...

Before I send these to the ebay hustle, thought I give you folks an opportunity to snatch them up.

Email me at spankyfrost AT yahoo dot com

I have more things... but will post them separately as I prepare them for shipment. I do prefer USA Only shipment since overseas is such a hassle and I am very suburb (post office and UPS, etc. many many miles away). So unless there is a worth while offer, I'd rather keep the shipment to USA Only.

Thanks... ~ Ed

No, sorry. I do have a couple of MEC's (one black and one blue) that I'll be posting for sale eventually.

Hey Ed - you're keeping *some* sort of PARIS rig, right? I only ask because as a Reaper user yourself there are going to be developments this year that are going to interest users of both (at least if I have anything to do with it). Unless you urgently need the cash from all of it, you might consider keeping a Bundle III held back and tucked away.

Roland JD 990

Roland JV 880

Proteus 1

Procusion

Will take best offer for all or any item.

email me at eduardomack@gmail.com HHB Radios 30

compresor Looking for a PARIS III BUNDLE. \$499

Brandon Like it says on the tin...

I'm particularly interested in adding an EDS (and the connecting cable).

I may consider also adding 442 or another MEC and a C16. Ideally Black. Low prices would be good! ;)

I'm in the UK, but would consider international shipping if you can guarantee a safe, reasonably inexpensively delivery in working order. Please e-mail daniel_burneNOSPAM@yahoo.com (Without the NOSPAM).

Thanks,
DHi Pete,

Do you still have those?

Regards

Jouke

My email contact - fsacquaye@NOSPAM.yahoo.com (remove the "NOSPAM.") I bought this as a backup system in case something broke on my main system.

I bought it brand new from a guy who bought a bunch of Bundle III's from

EMU. It is brand new. I only hooked it up to confirm
