I had 2 hard drives go out on me a few months back, power surge. I just realized everything PARIS I've collected over the past 16 years is lost. All my skins, videos, efx, manuals, presets, tips, cfg, everything. I did not notice until today, I was planning to set up a dedicated PARIS computer again. Argh, this sucks!

All I have is PARIS 3.0 x64 installer exe.

Can anybody email or dropbox me anything PARIS related to: willtheweirdo@gmail.com

I'm on the PARIS wiki now, getting what files I can, any help is appreciated. FWIW, I don't need anything UAD card related.

Hi Will,

I'm dropboxing some zip files to you including skins. I've got some other items. Let me know and I'll zip them to ya.

Wayne

I just used http://wetransfer.com for the first time today; works like a breeze for file transfers. Very slick, beats the heck out of email for fast, easy transfers.
