I have a good track with a couple of spots that clipped. How can I repair that clipping?

Thanks, Kevin

Good question. You could cut 'n paste from other areas, oe try to redraw, but I doubt that would work.

IME, you're right, redrawing only works if it's something

that's clipping "out" - if it clipped "in", you're screwed -
you're better off pasting another section in.
