On my Mac the first file did lose its resource forks but it opened in Word anyway. No binary garbage. An extension-less Mac file is usually a worst-case

test, at least it is for MIME attachments.

OK, fuck it... I'm just gonna post it as a regular text post, not a document LOL The document's just prettier, with highlighted & bolded text in certain places, etc.

Look for a new thread regarding vst freebie plugins.
