
Subject: OT: Cubase transcribing features?

I know there's a lot of Cubase knowledge around here, so I thought I'd ask...

I have a recording of a duo (acoustic guitar and clarinet). This is a mix, so just a stereo track. I have no way to separate the clarinet from the guitar.

I need a transcription of the clarinet parts. On paper, you know with a staff and notes in standard notation.

This is either an exercise in writing out the notes... or using a tool to do it.

Anyone know if Cubase can do that? This would be a double challenge, because first, I need to somehow "isolate" the clarinet (i.e. get rid of the guitar) before proceeding to running a software tool to spit out the transcription.

Any ideas? Am I dreaming in la-la land? I'm sure the second half of my challenge is possible... just not sure about "erasing" the guitar...

Thanks in advance for any tips.
Dan
