Quick! Tracking tomorrow night and my trusty AKG D112 has gone to meet its maker. Should I get another D112 or try something else?

Hard to beat a D112. I also like Sennheiser 421's and they work in a lot of other apps.

I really like the Shure Beta 52. D112's are great also though, and if you've been happy with it, maybe you should just stay with that, unless you can get a music store to loan you a couple to do a shootout.

I agree with the others, I love the Audix D6, nice punch from the start. The Beta 52 worked great for me before, was the go-to mic, but needs to be placed just right. Also I have used an RE-20 and a 421 with an LDC outside the Kick with very nice results.. Not a big fan of the D112 myself.

I'm partial to SM7s, EV RE11s, RE20s, or even a speaker used as a mic...D112s sound fine, but to me they make all kicks sound pretty much the same...

Just another opinion.

The Yamaha subkick would be something to consider. It has allowed me to thwart smarmy mousse on a number of occasions and imparts massive grunt. The ATM 25 also imparts a character that is subliminally deep hued , with overtones of pungency without being inchoate..

Are you just wiring up a speaker (like an 8") to an xlr and sending to a pre?

Sort of...I usually use a 10" bass speaker, but the principal is the same...I
made a cable with pos and neg to an XLR plug, then to pre

The same technique can be used for just about any low frequency source -
try it with a bass cab sometime - it will likely astound you!

Which XLR pins do you attach to pos & neg on spkr?

Same as you would any other two wire (unbalanced) source, IE pin 2 hot pin
3 negative pin 1 unused...

I'm a die-hard RE-20 user w/ an occasional D12e for some extra "woomph".
I did use a buddy's Yamaha Sub-Kick once and it was very cool (in conjunction
w/ the RE-20).

Hmmmm, we might actually try this. One of the Monkeys is a dedicated tinkerer.
Do you have the speaker in a cab or do you just mount somehow so it's in
the air?

My go to is a Beyer TGX50 (now the Opus 65) and my custom painted, flamed Yamaha Subkick.... Got way over the 112 years ago...

One of my fav studio drummers here got the Beyer and now carries it to sessions...

It's a power pop band, we're using a Yamaha Recording Custom kit, so a 22" birch kick drum, Evans heads, I forget the line but they were at least expensive so I hope they're good.

Because of the nature of the music there's a lot going on almost all of the time, so delivering a track that will cut through the mix is more important than sonic realism. In the demo process I'm using far less overheads than I usually do to get more of a tight, close mic'ed sound. Usually I try to get the drums almost all of the way with just kick/snare/OHs but there's just too much going on with these tracks.

I'm leaning toward getting another D112 just because I know it. Some of the other mics here intrigue me, but I've heard of them many times before.

EMAD? those rock. Love 'em. Will not use anything else anymore after hearing what they do. Get the front and back heads, it matters. Keep your mic hole in the front fairly small, just enough to breath if it doesn't come pre cut. You'll get more bottom end the further out you get from the batter head. Don't put the mic in the center, it'll phase out and sound bad.

Beta 52 or Audix D6 is the ticket here... the 52 is more hyped and requires less EQ to cut through and be big.

OK. If I ever start a rock band, I will either call it Smarmy Mousse
or Massive Grunt.

Haven't decided yet.

Either one of these are great. My last Soul/Funk album we used the Beta 52 and dug it a lot, we just had to move it around to find the sweet spot. This new album, I decided to try a D6 that a friend had. I just stuck it in there and this mic sounded great out of the box. Nice punch that sits well in the mix. Now with my D6 and 52 I'm pretty much covered.

Massive Grunt is an incredibly funny band name. I can't stop laughing. It coalesces images of orgasming teenagers and constipated senior citizens. Hideously exquisite.

Isn't Massive Grunt the name of the Spinal Tap comeback album?
