---=_linux431ffa63--Hi,
I wonder if the Paris adat sync out of card's a mec can send sample accurate
sync...
I have read on an old post that is used minly for transport controls.
But if it is used only for that then midioverlan sending MTC is adequate for
me.
I am asking because I am using on second PC Creamware's pulsar cards and I
could get the sync plate for pulsar which has 9 pin adat connectionns along
with extra wordclock in/out.
So if the sony out from Paris would start my Cubase with ALWAYS sample
accurate positioning, instead of MTC which is not alkways sample accurate
(without using the wordclock in/out) then this would be great.
Regards,
Dimitriosthat's one big ass hot tub...but i can't see how those little bubbly
jets will work when you're not actually in the water.  just call me
einstein 2.

>Hello,

I am not new to PARIS but I've been away from music for a few years. I've
dug out my PARIS system recently and started aquiring gear to augment the
system. I have been lurking here and at gearslutz.com for several months and
have learned quite a bit. I see that some of you are using other DAWs with
PARIS. I'd like to do the same. I also have some decent outboard gear I'm
using. I've included a photo if anyone is interested. I hope it shows up.

Right now, I have PARIS set up on it's own, using some outboard gear as
inserts and aux. FX. I've also found a way to use the Aux sends as busses so
that I may strap stereo dynamics across a multiple track sub. I do very
little editing, and don't really use any PARIS effects. I esentially am
using PARIS as you would a tape deck and desk, I do use the editor for track
alignment with multi mic sources, and I will on ocasion remove a flub, but I
did that with mutes back in the day anyway.

I have a second computer running SX which has an RME HDSP 96/52 in it. I
really only use it to transfer SX tracks from another studio into PARIS, but
I think I'd eventually like to either begin recording into SX or even
upgrade to Nuendo, and simply use PARIS as a mixer. THe main reason dor this
is to use the SX latenc compensation. I also have a couple UAD-1s and some
soft synths that I may or may not use (I have 8 analog channels of decent
compression and EQ, and prefer using these, printing them to disk as I need
more channels). My ultimate goal is to eventually replace PARIS with either
a mixer (probably a neotek) or a summing box (probably an API). The bigest
problem is that PARIS is SO easy to use for me compared to SX. I'm from the
old school. Learned on a 4 track cassete, moved to a Tascam 38 1/2",
eventually replaced it with a couple af DA-38s and then PARIS.

My first question is...where would you all go from here? I will eventually
need some nice converters. Should I buy a Lynx Aurora or Appogee DA and
AD-16x now (I have a big ben an

some
issues with routing sound when I don't tell it to (I was recently doing a
drum sub using an auxlary mix to two new tracks and I was getting aux
bleed, even when no auxlary send was active). It's stuff like that that
just makes me drop what I'm doing and go eat a doughnut or something.

An
