here. Still, it would be a bit cheaper than my local service for the two lines I've got here. I have two land lines and two mobile accounts. Once they get it sussed for mobile phones, I will be able to shuffle things around to use the one DSL line for the house and the mobile for my office and I will likely save about \$200.00 per month.

That will RAWK ;o)

>Hi,

I lost all my Paris skins from accidental erase !

Anyone has gothered them ?

I am looking mostly for the balck ones (not with the yellow,purple leds etc)

But I could use all.

Regards,

DimitriosI fired up an older Windows ME PC and decided to upgrade Soundforge on it, which requires Directx 8. I had effects before that.. now all I have are two selections..

NO EFFECT  
EXTERNAL

can anyone help.. of course..I have a remote session tomorrow that I use this pc for..

thanks

nickHave you tried re-installing Paris? Back-up your effects files first or you will lose your presets. Remember to re-boot after each step.

David.

>If he's using external sound modules, he needs to route the audio from the  
module to an input on his sound card, then enable an audio track in Cakewalk  
to record it.  
If he's using the internal sound card for audio, there are shareware  
programs that will capture the audio at the sound card output and convert it  
to WAV.  
There may be better solutions, but those are the first two that pop into my  
mind.

Barryl spoke to Erling on it a few months back too with same deal. I understand he gets a bunch of free overseas minutes every month. My plan on the other hand costs \$1.72 or something to call the U.S. or U.K. for an hour... hardly going to break the bank. ;o)

Cheers,  
Kim.

>I know this has been discussed before, but what is the most current version of Waves that can run w/ Paris?

I just tried the Transformer Bundle demo in Digital Performer.

The Soundshifter plugin is amazing! I'd love to be able to run it in Paris, but I haven't been able to run anything more recent than Waveshell 3.2.

Thanks,

GanttSeriously, this is a sad story. It's motivated me to double check my DIY power distro I made for my band. I followed proper procedure, but the thing gets banged around a lot, so better safe than sorry.

David, I agree with you here. I just want to add that I have also seen many churches ripped off by unscrupulous dealers who charge them several times what they charge other clients...while also providing poor installation.

Man, you got that one right. I am pleased to say that we murder those guys as often as we can, and enjoy doing so. We go in, do one great job, and the crook never gets another job with that demomination again.

Sometimes I love my job...

me too lost mine in a migration.I've posted a ton of files from DJ on what will from now on be known as "The

Emu/Ensoniq Paris File Vault" web site. Be sure to look at the "Read Me" files so you know what's what. We're still missing one file in Mic Shootout 2. It's the SE Titan normal voicing. I'll add it as soon as DeeJ sends it to me. I've also added a web interface to make navigation a little easier.

Go here and check it out:

[www.mercysakes.com](http://www.mercysakes.com)

Enjoy!

Tony

PS - DeeJ, let me know if anything looks screwed up.Sorry Gantt, it's just a PC thing with Windows.
