Subject: Where'd my taskbar go?

Posted by [Deej \[1\]](#) on Fri, 12 May 2006 02:11:26 GMT

[View Forum Message](#) <> [Reply to Message](#)

---

I just had to swap monitors on a machine running Win 95. I had been using a 17" Samsung LCD. I switched to an old E-systems 15" CRT. The taskbar at the bottom has disappeared. The computer I,oaded the proper driver for the CRT and I have adjucted the resolution to where it should be, but no taskbar shows up at the bottom of the screen.

Am I hallucinating.....(again)?

position your cursor at the bottom of the screen, click on the very edge of the screen & drag upwards... it should expand.

Tried it.....didn't work. I just booted into Safe Mode and it showed up. Now I'm rebooting again and hopefully it will show up again.

Dude, I've seen it kill IE after first launch and only allow the user in that first launch session put in a FULL url.. meaning, no shortcuts like [www.whatever.com](http://www.whatever.com) , instead making you type the full <http://www.whatever.com> ..... -wierd- stuff happens. I would rule nothing out when it comes to that particular clsid.
