Hi all,

I am setting up a new studio and have always wanted to try paris, so I thought this would be a good place to start.

Ideally I would like to get a full system, though I am also considering building one piece by piece. This will be interfacing with a 32 channel analog board.

Thanks!

Might be able to help you. I've got a 4 card system looking to get rid of.

- 4 EDS cards
- 1 MEC
- 1 Interface 442
- 1 24 bit in
- 4 C16

Let me know

Thanks,
Pete
