Hi Rob,

Nope. this is an AMD64 dual core chip. It won't work on a 939 mobo.

I have for sale an extra 8-in and 8-out card that are just not totally fitting

into my current setup. I can part with these with or without a spare MEC that I also have. Please email me an offer for any or all of these extra parts. They are in good condition and I'd love to see them find a new more productive home.

-David I need a C16 in working condition.

Anyone??

Here's what I have still available:

(2) Control-16's (one black, one blue)

(2) EDS-1000 cards
