Do you need to run the wavs through stripwave? Sometimes newer header versions give Paris fits. I've got a copy if you need it

Content-Type: text/plain;

charset="iso-8859-1"

Content-Transfer-Encoding: 7bit

I have some wav files that were recorded in Live 5. I can't, however, load

them into Paris. Well, it loads them, but only as files that are 2k big.
The original files are on the order of tens of megabytes. And, does anyone
know where I can find AudioX's "Auto Add" program? I can't locate audiox
anywhere on the net.

Thanks

MR

Thanks Jeff and Rod.
Looks like Strip Wave was the way to go.

And I think you're looking for AnalogX Auto Add, not Audiox.

I eventually figured that one out. I have a small red mark right in the middle of my forehead to prove it.
