Its not finished. Lots of gear is still not plugged in, new carpets have to go down and the recording room is yet to be set up. That room looks the same as the one in these shots, but I'm storing stuff in there for now. I know it sucks to have the monitors in front of windows. I'm not sure how to handle that -maybe draps for mixing time? I imagine that I'll have to "shoot" the room at some point. At least to know where the bumps and holes are. In the end though, this place is so much better than any other space I've been in to date. These rooms are on the second floor. Downstairs is an open, currently unfinished space about the size of a small one bay garage. Seems large enough to float a room in. If we elect to buy the house that comes with this space, maybe I'll pretend I'm a carpenter...
Pics below:

Very nice Mike.

Rob

"Mike R." <emarenot@yahoo.com> wrote in message news:4568ad9f@linux...

Its not finished. Lots of gear is still not plugged in, new carpets =
have to go down and the recording room is yet to be set up. That room =
looks the same as the one in these shots, but I'm storing stuff in there =
for now. I know it sucks to have the monitors in front of windows. I'm =
not sure how to handle that -maybe draps for mixing time? I imagine =
that I'll have to "shoot" the room at some point. At least to know where =
the bumps and holes are. In the end though, this place is so much =
better than any other space I've been in to date. These rooms are on =
the second floor. Downstairs is an open, currently unfinished space =
about the size of a small one bay garage. Seems large enough to float a =
room in. If we elect to buy the house that comes with this space, maybe =
I'll pretend I'm a carpenter... Pics below:

Yes, very cool. BTW, in regards to your comments about the monitors having glass behind them - I tried that for awhile in my current place & I didn't really like it... moved the listening position to one of the other walls. What if you

covered the far left & far right window frames with plywood & then either some kind of Auralex foam or better yet glue some OC-703 covered with some fabric on top of that? That way you could still have the middle window to let some light in, but you'd get some good absorption behind & right around the speakers... having the one section of glass in the middle wouldn't be too disastrous, I don't think.

Neil
