Not listed in my ebay listing is ATTO SCSI card and Marathon Rackmount kit
(installs very easily) - make me an offer and I might just toss these in.

Runs OS X Tiger (not included) or OS 9 (for Paris!) - Has 4 PCI slots.

$650 obo

email justin@jyaf.comhi larry- is your EDS1000 card in good shape? no damage to the ethernet
port?
 my card has some damage to its ethernet port, which makes the C16 a bit
finicky to operate, and i need to send it out to be fixed- but before i do
that, i'd like to have a second card i can use, in good working order, so
i won't be entirely left without the use of my paris system, while things
are being fixed with my other card--- please let me know if all is well
with your card---
