Decided to swap video cards and see if that would help Paris installation recognize the hardware. Took out the Matrox and put in a Geforce 2. Runs at minimum resolution with 4-bit color. Claims that it can't find enough resources. So I attempt to install some nvidia drivers. Sez to uninstall old drivers first, which I do, then reboot. Boots to the black Windows xp screen, and then goes dark and hangs there. Tried safe mode, same thing. Tried a windows repair from the windows CD, same thing. I've never run into this before. It seems there's no video driver in windows??? anybody. . . .
