I was working on a project the other day and suddenly discovered that all
of my eds effect presets where missing. What happened? In my emu paris folder
I have the paris_fx.var (default) file and another of the same, without the
default. I am running paris
3.0 on an XP machine. Someone please give me some direction or solutions.

Thanks

You have to open the "FX Projects" It is a ".ppj"file..(named
reverb,flanger,etc.. then open the FX in Paris, and save it in the bottom
"project" folder...
