1. is it possible to fix bugs in v3.0 paris?

2. is it possible to use real time 2 adat cards per mec.. 2 mec with 2 adats each setup as converter to or out of LOGIC thru ray gun optical I/O card from RME on other computer!

3. is it possible to ask ID to share software free after 10 years of discontinued PARIS??? or to share software info so third party can work within software

.. few questions for start!!!

1) Nothing that's in the app itself without source code. There are still lots of possibilities in the drivers and DLLs. What are your top bugs you'd like to see addressed?

2) Yes, I do it every day. Two ADAT modules in one MEC, one and an 8i in the other, for a total of 24 optical and 8 analog i/o (plus eight more in the MEC master sections). Works great.

I'll let Mike chime in on the last point.
