Hello All,

I'm looking to try and install Paris Pro.
I took every thing off the computer inducing Paris 2.1

My computer is running Windows XP with service pack 3 installed.

What is the proper way to install 3.0, mikes driver update. I'm getting a black screen and a reboot form the computer.

So I know I need to take the 1000 card back out of the system and install the software first. Mike A. was talking about using his installer to do this. Where can I find this at or is this his XP & up drivers?

Help - Thanks - Jeff

Never mind, I got it all working!!

Thanks Guys! 3.0 Rocking out!
